

# LED EasyConnect System

LM300L Colour changing programmable RGB LED Controller.

LED Plug and Play option packs (above)  
'LightMaster' LED strips (below)

## Features:

Plug and Play enables a system to work in minutes.

RGB strips for endless colour effects.

Exterior IP68 versions, enhances the range.

Wash a reception with light for a subtle or dramatic effect.

Light windows, cabinets with colour or white light.

It is ideal for small to major projects.

'LightMaster's programmable RGB LED's plug-and-play design makes it simple to create and install any size of colour changing display using three main types of components:

LED Light Strips in lengths of 83, 166 and 333 millimetres . . .

A variety of connector leads . . .

Different types of junction boxes.

RGB LED's are the perfect tool for creative lighting.

They not only offer superb levels of brightness, they're also robust, efficient and operate with a safe, extra-low voltage input of only 24VDC. This low power consumption means displays are inexpensive to run and generate little heat, and unlike conventional lighting, there are no lamps to change.
